About the Department

The Department of Mechanical Engineering has been established since the inception of the institution in the year 2002. The Department has good infrastructure facilities and is equipped with full-fledged laboratories to fulfil the curriculum needs. The Department has well experienced faculty. Around one-third of the faculty members in the department are Doctorate. The department has good number of sanctioned projects, funded by different agencies/industries. The Department is intended to be allotted a Research Centre by JNTU Hyderabad.

Overview of the Programme:

The primary responsibility of faculty is not only to inspire students towards a higher vision but also create a strong sense of bonding between the institution and the students to nurture a stress-free holistic environment. To enhance the quality of life for the student members enabling them to introspect and learn techniques that imbibe ethics & morals and help prepare students for active and successful participation in a modern society, producing individuals of high character, probity and honor.

Proposed course is a wide group of analysis techniques used in science and technology industry to evaluate the properties of a material component or system without causing damage. NDT methods rely upon use of electromagnetic radiation and other signal conversions to examine a wide variety of articles.

Objectives of the Programme

- To use the techniques, skills and modern engineering tools necessary for engineering.
- Used in science and technology industry to evaluate the properties of a material.
- Understanding of professional and ethical responsibility in the areas of material testing.
- Ability to communicate effectively the mechanical properties of materials.

Topics to be covered

- ❖ Theory and Principles of Acoustic Emission
- ❖ Introduction to NDT, Comparison between destructive and NDT
- ❖ Importance of NDT, Scope of NDT, difficulties of NDT
- ❖ progress in NDT, economics aspects of NDT
- ❖ Visual Inspection - tools, applications and limitations - Fundamentals of visual testing: vision, lighting, material attributes, environmental factors.

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the Program

After successful completion of the Course, one can apply for jobs in various industries. Non-destructive testing also has significant value as a quality control for industries where mechanical failure would incur major costs or put lives in danger.
