About the Department

The Department of CSE was started in the year 2005 with a vision of imparting high-quality education to suite the global standards in Computer science and Engineering. The department has got highly qualified & committed faculty members supported by dedicated technical staff.

The department has its own library and sophisticated laboratories not only to suite curriculum requirements but also to serve research needs such as Computer Networks, Data Mining, Software Engineering, Image processing & Cloud Computing. Workshops, software simulation etc.

The department formed CSI and ISTE student branch for the benefit of students and faculty by conducting technical Conferences, workshops, FDPs and Guest lectures.

Overview of the Programme

The **Network Security** course recognizes basic skills in installing, supporting, and troubleshooting wired and/or wireless networks. One can choose from several tracks, including Cloud, Collaboration, Cyber Ops, Data Center, Industrial, Routing and Switching, Security, Service Provider and Wireless.

The **Network Security** certification validates your skills and knowledge in network fundamentals, network access, IP connectivity, IP services, security fundamentals, and automation and programmability.

Objectives of the Programme

During the Cisco Networking Academy® course, administered by the undersigned instructor, the student was able to proficiently:

- Understand and describe basic switching concepts and the operation of Cisco switches
- Understand and describe enhanced switching technologies
- Understand and describe dynamic routing protocols, distance vector routing protocols, and link-state routing protocols
- Configure and troubleshoot basic operations in a small switched and routed network
- Configure and troubleshoot VLANs and inter-VLAN routing

Topics to be covered

- Basics of Networking,
- TCP/IP model ,
- Introduction to Identity Theft & Identity Fraud,
- Current Computer Forensic Tools,
- Security Mechanism.

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the program,

On completion of this course, participants will be able to equip with all the skills required to match their expectations.

VAC-NETWORK SECURITY- Summary

20.08.2015

Course duration:17th August 2015 to 21st August 2015

Overview of the Course

A network security course discusses different types of malicious attacks and various methods of responding to them. Students learn how to protect computer networks by using security codes. The course also examines malware, social engineering attacks, operating system holes, web security, privacy and e-mail hacking.

The main objective of this course Learn and examine the theory and practice of network fundamentals from the defender's and attacker's perspectives. You will have the opportunity to use tools for networking that allow you to query services, test routing and more.

The speaker also covered the following topics:

The basic principles of network security and cyber-attacks, Real-world security case studies Protecting assets, Intrusion detection systems, Assessing security threats from a practical and theoretical viewpoint.

Outcome of the program

At the end of the course, you will have the opportunity to challenge yourself to a network security boot camp – can you work with a virtual networked device to make it secure

After successful completion of the course the certificates are issued to the participants
