About the Department

The Department of CSE was started in the year 2005 with a vision of imparting high-quality education to suite the global standards in Computer science and Engineering. The department has got highly qualified & committed faculty members supported by dedicated technical staff.

The department has its own library and sophisticated laboratories not only to suite curriculum requirements but also to serve research needs such as Computer Networks, Data Mining, Software Engineering, Image processing & Cloud Computing. Workshops, software simulation etc.
The department formed CSI and ISTE student branch for the benefit of students and faculty by conducting technical Conferences, workshops, FDPs and Guest lectures.

Overview of the Programme

The JAVA PROGRAMMING course recognizes basic skills in installing, supporting, and troubleshooting wired and/or wireless networks. One can choose from several tracks, including Cloud, Collaboration, Cyber Ops, Data Center, Industrial, Routing and Switching, Security, Service Provider and Wireless.

The JAVA PROGRAMMING certification validates your skills and knowledge in network fundamentals, network access, IP connectivity, IP services, security fundamentals, and automation and programmability.

Objectives of the Programme

During the Cisco Networking Academy® course, administered by the undersigned instructor, the student wasable to proficiently:

- Understand and describe basic switching concepts and the operation of Cisco switches
- Understand and describe enhanced switching technologies
- Understand and describe dynamic routing protocols, distance vector routing protocols, and link-state routing protocols
- Configure and troubleshoot basic operations in a small switched and routed network
- Configure and troubleshoot VLANs and inter-VLAN routing

Topics to be covered
- Exploring the Network,
- Configuring a Network Operating System,
- Network Protocols and Communications,
- Network Access

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the program,

On completion of this course, participants will be able to equip with all the skills required to match their expectations.

VAC- JAVA PROGRAMMING (JP) - Summary

10.07.2019

Course duration:10th July2019 to 14th July, 2019

Overview of the Course

This course engages students to analyse complex business scenarios and create JAVA programs —This Java Programming provides extensive experience with Java and its object-oriented features. You use Java to create both console and GUI applications. You build robust applications using Java's object-oriented features as well as develop platform-independent GUIs. You also learn to read and write data using Java streams and retrieve data from a relational database with JDBC..

The main objective of this programme is to provide to learn the techniques and tools to design, mploy best practices to build reliable and scalable Java applications Effectively apply test-driven development to enhance program maintainability. Solve architectural problems with proven design patterns. Employ advanced Java APIs for multi-threaded programming.

The speaker also covered the following topics:

- Design and build robust, object-oriented applications
- Organize complex data using Java collections
- Access any relational database using JDBC
- Read/write files and handle exceptions

At the end of this course, students will be able to explore the basics of JAVA all operating systems, all types of devices...you'll find Java everywhere. You'll learn the language, but you'll also learn some key underpinnings of programming as well. It's also an object oriented programming (OOP) language.

After successful completion of the course thecertificates are issued to the participants
