About the Department

The Department of CSE was started in the year 2005 with a vision of imparting high-quality education to suite the global standards in Computer science and Engineering. The department has got highly qualified & committed faculty members supported by dedicated technical staff.

The department has its own library and sophisticated laboratories not only to suite curriculum requirements but also to serve research needs such as Computer Networks, Data Mining, Software Engineering, Image processing & Cloud Computing. Workshops, software simulation etc. The department formed CSI and ISTE student branch for the benefit of students and faculty by conducting technical Conferences, workshops, FDPs and Guest lectures.

Overview of the Programme

Python is a high-level, interpreted, interactive and object-oriented scripting language. Python is designed to be highly readable. It uses English keywords frequently where as other languages use punctuation, and it has fewer syntactical constructions than other languages.

Proposed course helps students as

- It supports functional and structured programming methods as well as OOP.
- It can be used as a scripting language or can be compiled to byte-code for building large applications.
- It provides very high-level dynamic data types and supports dynamic type checking.
- It supports automatic garbage collection.

- It can be easily integrated with C, C++, COM, ActiveX, CORBA, and Java.

Objectives of the Programme

- The fundamentals of python programming.
- describe the various operators and control flow statements
- Analyze various data structures, make use of functions
- Discuss about MODULE s, packages in python, object-oriented concepts, exception handling
- Illustrate advanced concepts like multithreading, graphics and generate various test cases.

Topics to be covered

- Introduction to Python
- List, Ranges & Tuples in Python
- Python Dictionaries and Sets
- Input and Output in Python

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the program

After completing the Course, the participants will be able to explore the basics of python programming languages, can write simple programs with control structures and can apply advanced concepts like data structures and make use of functions. develop simple applications by using MODULE s, packages and exception handling mechanisms.

VAC-Python programming - Summary

14.07.2019

Course duration: 9th July 2019 to 14th July, 2019

Overview of the Course

Python is a high-level, interpreted, interactive and object-oriented scripting language. Python is designed to be highly readable. It uses English keywords frequently where as other languages use punctuation, and it has fewer syntactical constructions than other languages.

The main objective of this Learn about It supports functional and structured programming methods as well as OOP. It can be used as a scripting language or can be compiled to byte-code for building large applications. It provides very high-level dynamic data types and supports dynamic type checking. It supports automatic garbage collection.

The speaker also covered the following topics:

Introduction to Python, List, Ranges & Tuples in Python, Python Dictionaries and Sets Input and Output in Python.

Outcome of the program

At the end of this course, By the end of the course, students will be able to explore the basics of python programming languages, can write simple programs with control structures and can apply advanced concepts like data structures and make use of functions. develop simple applications by using MODULE s, packages and exception handling mechanisms

After successful completion of the course the certificates are issued to the participants
