About the Department

The Department of CSE was started in the year 2005 with a vision of imparting high-quality education to suite the global standards in Computer science and Engineering. The department has got highly qualified & committed faculty members supported by dedicated technical staff.

The department has its own library and sophisticated laboratories not only to suite curriculum requirements but also to serve research needs such as Computer Networks, Data Mining, Software Engineering, Image processing & Cloud Computing. Workshops, software simulation etc.

The department formed CSI and ISTE student branch for the benefit of students and faculty by conducting technical Conferences, workshops, FDPs and Guest lectures.

Overview of the Programme

Big Data is a suite of public cloud computing services offered by Google. The platform includes a range of hosted services for compute, storage and application development that run on Google hardware.

Learn ways of storing data that allow for efficient processing and analysis, and gain the skills you need to store, manage, process, and analyze massive amounts of unstructured data to create an appropriate data lake.

Objectives of the Programme

To study the basic technologies that forms the foundations of Big Data, To study the programming aspects of cloud computing with a view to rapid prototyping of complex applications To understand the specialized aspects of big data including big data application, and big data analytics, To study different types Case studies on the current research and applications of the Hadoop and big data in industry.

Topics to be covered

- Big Data Overview
- Data Analytics Lifecycle
- Introduction to R
- Hypothesis Testing
- Hadoop API
- PIG - HADOOP TOOL
- HIVE - HADOOP TOOL

Big Data and Machine Learning in the Cloud

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the program,

On completion of this course, participants will be able to equip with all the skills required to match their expectations.

VAC-BIG DATA- Summary

21.01.2016

Course duration:18th January 2016 to 22nd January 2016

Overview of the Course

Big Data is a suite of public cloud computing services offered by Google. The platform includes a range of hosted services for compute, storage and application development that run on Google hardware.

The main objective of this Learn ways of storing data that allow for efficient processing and analysis, and gain the skills you need to store, manage, process, and analyse massive amounts of unstructured data to create an appropriate data lake. The speaker also covered the following topics:

Big Data Overview, Data Analytics Lifecycle, Introduction to R, Hypothesis Testing, Hadoop API, PIG - HADOOP TOOL, HIVE – HADOOP TOOL.

Outcome of the program

At the end of this course, participants are able to get an overview of what big data is, to get an idea about the programming aspects of cloud computing with a view to rapid prototyping of complex applications and have the specialized aspects of big data including big data application, and big data analytics, cover different types Case studies on the current research and applications of the Hadoop and big data in industry.

After successful completion of the course the certificates are issued to the participants
