One Week Value Added Course on Data Analytics using Python

Course Code : DS-VAC002   **Duration of Course: 36Hrs**

Objective of the Course

1. Data Analysis with Pandas and Python is bundled with dozens of datasets for you to use and most powerful data toolkits are available.
2. Data Collection and Preparation, Data Cleaning and Processing.
3. Numerical Data Analysis with NumPy and Exploratory Data Analysis (EDA).
4. Statistical Analysis and Hypothesis Testing.
5. Machine Learning and Predictive Modeling.

Syllabus

UNIT I: Introduction to Data, Data Preparation, Cleaning & Pandas   Total Hrs:15
Understand the problem you're trying to solve and define what data you need. Clean and preprocess the data to remove inconsistencies, missing values, and outliers.Pandas provides tools for data cleaning, transformation, and feature engineering. Gather relevant data from various sources (CSV files, databases, APIs, etc.). Libraries like pandas are excellent for handling tabular data.

UNIT II: Data Analytical Tools   Total Hrs:21
NumPy is a fundamental package for scientific computing in Python. It offers a high-performance multidimensional array object and tools for working with arrays. You can perform arithmetic operations, create arrays, and manipulate data efficiently using NumPy. Explore the data to understand its distribution, relationships, and patterns.

Use matplotlib to generate histograms, scatter plots, bar charts, and more to gain insights. Use statistical methods to validate hypotheses and draw conclusions. Libraries like scipy provide functions for statistical tests. Apply machine learning algorithms to build predictive models. scikit-learn is a popular library for machine learning in Python.

Outcomes:

● Perform a multitude of data operations in Python's popular pandas library including grouping, pivoting, joining and more!

● Learn hundreds of methods and attributes across numerous pandas objects

● Possess a strong understanding of manipulating 1D, 2D, and 3D data sets

● Resolve common issues in broken or incomplete data sets

Department Vision: **To attain global standards in Computer Science and Engineering education, training and research to meet the growing needs of the industry with socio-economic and ethical considerations.**
