One Week Value Added Course on Cloud Security

Course Code : DS-VAC004   **Duration of Course: 36Hrs**

Objective of the Course

1) Fundamentals of cloud computing architectures based on current standards, protocols, and best practices intended for delivering Cloud based enterprise IT services and business applications.

2) Identify the known threats, risks, vulnerabilities and privacy issues associated with Cloud based IT services.

3) Understand the concepts and guiding principles for designing and implementing appropriate

Syllabus

UNIT I: Security Design and Architecture for Cloud Computing   Total Hrs:18

Guiding Security design principles for Cloud Computing Secure Isolation Comprehensive data protection End-to-end access control Monitoring and auditing Quick look at CSA, NIST and ENISA guidelines for Cloud Security

UNIT II: Secure Isolation of Physical & Logical Infrastructure   Total Hrs:18

Compute, Network and Storage Common attack vectors and threats Secure Isolation Strategies Multitenancy, Virtualization strategies Inter-tenant network segmentation strategies Storage isolation strategies.

Outcomes:

1. One of the most obvious outcomes of attending a cloud security workshop is that you will gain a deeper understanding of cloud security concepts and best practices.

2. In addition to learning about cloud security concepts and best practices, attending a workshop may also give you hands-on experience working with cloud security tools and technologies. This can help you develop practical skills that you can apply in your work or personal projects.

Department Vision: **To attain global standards in Computer Science and Engineering education, training and research to meet the growing needs of the industry with socio-economic and ethical considerations.**

3. Workshops can be a great place to meet other professionals who are also interested in cloud security.

4. Finally, attending a cloud security workshop can help you feel more confident in your ability to secure cloud infrastructure and data. This may include feeling more comfortable with cloud security tools and technologies, more confident in your ability to identify and respond to security threats, or more knowledgeable about best practices for securing cloud environments.
