About the Department

The Department of CSE was started in the year 2005 with a vision of imparting high-quality education to suite the global standards in Computer science and Engineering. The department has got highly qualified & committed faculty members supported by dedicated technical staff.

The department has its own library and sophisticated laboratories not only to suite curriculum requirements but also to serve research needs such as Computer Networks, Data Mining, Software Engineering, Image processing & Cloud Computing. Workshops, software simulation etc.

The department formed CSI and ISTE student branch for the benefit of students and faculty by conducting technical Conferences, workshops, FDPs and Guest lectures.

Overview of the Programme

machine learning (ML), and artificial intelligence (AI). This blog post answers many of the questions I recount having prior to learning about the work, techniques, jargon, and tooling in ML and AI.

Many companies will market their systems or services as “powered by AI” when it’s not often the case. We will always find these instances of gimmicky marketing, so it is helpful to first understand what is AI and ML, and the different terms, as there are many relevant use cases of AI and ML in our world today.

Objectives of the Programme

This course provides the students a broad introduction to python programming, machine learning, discuss about various learning algorithms like decision tree learning, Bayesian learning, computational learning, instance based learning, combined inductive and analytical learning methods, analyze genetic algorithms and various learning set of rules

Topics to be covered

- Introducing Concept Learning
- Description length principle
- Models of Evolution and Learning
- Sequential Covering Algorithms
- Learning Task, Q Learning, Non-Deterministic,
- Rewards and Actions
- Big Data and Machine Learning

Certificate

After successful completion of the course the certificates shall be issued to the participants.

Outcome of the program,

On completion of this course, participants will be able to equip with all the skills required to match these expectations.

VAC- Artificial Intelligence and Machine Learning- Summary

28/10/2023

Course duration: 08th th November 2023 to 13 th December 2023.

Overview of the Course:

The course introduces the variety of concepts in the field of artificial intelligence. It discusses the philosophy of AI, and how to model a new problem as an AI problem. It describes a variety of models such as search, logic, Bayes nets, which can be used to model a new problem. It also teaches many first algorithms to solve each formulation. The course prepares a student to take a variety of focused, advanced courses in various subfields of AI.

Objectives of the Course:

To have a basic proficiency in a traditional AI language including an ability to write simple to intermediate programs and an ability to understand code written in that language. • This course provides the students a broad introduction to machine learning, discuss about various learning algorithms like decision tree learning, Bayesian learning, computational learning, instance based learning, combined inductive and analytical learning methods, analyze genetic algorithms and various learning set of rules.

Outcome of the program:

At the end of the course, students will be able to Describe the key components of the artificial intelligence (AI) field. Classify knowledge representation techniques. Interpret various types of reasoning and processing. Discover game playing and apply knowledge
