**About the Department:**

The Department of Electrical and Electronics Engineering at MREC has been producing high quality technical manpower needed by industry, R&D organizations, and academic institutions since 2002 with an Intake of 60. The Department also offering PG Program EPS The department UG Program was accredited by NBA in 2008 and Re-accredited in 2014.

**Overview of the Programme:**

The primary responsibility of faculty is not only to inspire students towards a higher vision but also create a strong sense of bonding between the institution and the students to nurture a stress-free holistic environment. To enhance the quality of life for the faculty members enabling them to introspect and learn techniques that imbibe ethics & morals in their teaching and help pre-prepare students for active and successful participation in a modern society, producing individuals of high character, probity and honor.

Proposed FDP is helping to imbibe the skills and competencies required to achieve goals directed by values, to maintain and enhance faculty effectiveness by inculcating dynamism and leadership qualities and to develop commitment and ethical approach towards work, and instill a sense of responsibility towards the institution. Also to enhance communication and soft skills, by introducing innovative teaching methodologies and developing an inter-personal connection with students. To achieve this goal, Art of Living foundation is conducting this workshop through ATAL.

**Objectives of the Programme:**

- To imbibe the skills and competencies required to achieve goals directed by values.
- To maintain and enhance faculty effectiveness by inculcating dynamism and leadership qualities.
- To develop commitment and ethical approach towards work, and instill a sense of responsibility towards the institution.

To enhance communication and soft skills of the faculty by introducing innovative teaching methodologies and developing an interpersonal connection with students

**Topics to be covered:**

- Basics of Circuit Elements
- How to design different devices using different components
- Understanding The building electrical system

**Test and Certificate:**

A test will be conducted at the end of the program and the certificates shall be issued to those participants

**Outcome of the Program:**

After completing the Course, the faculty and students will :

- Understand the Components of Network Elements
- Understand the Behaviour of Series and Parallel Circuit

#### Report of Value Added Course on Application on DC Circuits

A thirty days Application on DC Circuits was organized by the department of Electrical and Electronics Engineering and the event was coordinated by Mrs. V. Y. Sudha, Assistant Professor, EEE Department from 17<sup>th</sup> Oct – 21<sup>st</sup> Oct 2022 and 70 students are attended from II year I Sem. The resource person of the programme Mr. Hanumantha rao. The quality of life for the students are enhanced by introspect and learn techniques that imbibe ethics and morals to help the students for active and successful participation in a modern society, producing individuals of high character, probity and honor. With the concept of the global village, engineering graduates as well as other graduates are expected to be presentable, display the right attitude, and to be able to blend with the company's corporate image. After the training programme, the students learned the following,

- On a DC circuit, current flows in one direction only. Voltage can remain at a level or change, but it always has the same polarity. The main source of DC is from batteries, photocells, fuel cells, rectifiers and DC generators.
- Understand in terms of circuit values the circuit condition needed for maximum power transfer associated with the hazard of electrical shock.
- Understand how current dividers work in a DC parallel circuit.
- Understand how to calculate power in a DC series and parallel circuit
