

In spite of the latest improvements in distributed RDF data management, processing a large number of RDF data on the cloud remains difficult. Despite its apparent simplicity, RDF stores rich and complicated graphs that include both schema-level information and instance. Typical strategies for splitting such data with the graph by the use of old min-cut algorithms result in incomplete distributed performance and a significant quantity of joins. In this work, we describe Diplo Cloud, a cloud-based distributed RDF data management system that is both efficient and scalable. Diplo Cloud performs a physiological examination of both instance and schema data before splitting the data in contrast to earlier techniques.

Raja Reddy Duvvuru
Chandana Priya Poreddy

RAJA REDDY DUVVURU received his B.Tech degree in Electrical Engineering from JNTU University, Anantapur in 2009, his M.Tech in Electrical Power Engineering from JNTU University, Anantapur in 2011. Ph.D. degree from JNTU University, Anantapur in 2018. He is currently working as an Associate Professor at **MALLA REDDY ENGINEERING COLLEGE, SECUNDRABAD.**
