The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

-- Paper ID# 38770

-- Please adhere to every detail of the guide of authors

<http://iaescore.com/gfa/ijeecs.docx>.

-- The minimum number of references is 25 references (for original research), and 50 references (for review/survey paper), primarily to recent journal articles.

-- Please attach your similarity report checking that the result is below 25% using software such as iThenticate or Turnitin.

Dear Prof/Dr/Mr/Mrs: Mr Mukund Ramdas Kharde,

It is my great pleasure to inform you that your paper entitled "Design and analysis for robotic arm position for automatic electric vehicle" is initially ACCEPTED and will be published on the Indonesian Journal of Electrical Engineering and Computer Science later, after all final documents have been completed and reached us. This journal is indexed by Scopus (<https://www.scopus.com/sourceid/21100799500>) and ScimagoJR (<https://www.scimagojr.com/journalsearch.php?q=21100799500&tip=sid&clean=0>), with CiteScore: 2.9, SNIP: 0.579, and SJR: 0.247. Congratulations!

Your paper will be published after fulfilling all requirements for publication (strictly follow the guidelines at <http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5>).

The presentation of the simulation and/or experimental setup (in the Method section) must be clear and complete in every detail facilitating reproducibility by other scientists. Present a picture of your simulation and/or experimental setup and describe your work clearly. Please present each reference as completely as possible while adhering to IEEE style (including volume, number, pages, and DOIs). For your information, according to international regulations, the similarity score of camera-ready paper should be less than 25%. A single author is NOT acceptable, and will never publish in this journal.

Please submit your below documents within 30 days to ijeecs.iaes@gmail.com

1. Final camera ready paper (in MS Word file format, or LaTeX source files)
2. Similarity report checking (that the result is below 25%, uses software such as iThenticate or Turnitin), and
3. Payment evidence

The editor(s) will decide whether or not your camera-ready paper is complete and meets the final guidelines.

When you send in all of the above documents and your final paper follows all

of the final instructions, your paper will be judged "fully accepted." It will be the date of your paper's acceptance.

As one of the requirements for publication in this journal, we would also like you to provide a 15-minute video presentation of your paper. Please record your presentation (for example, with Zoom or other software) and use the virtual background template at <https://bit.ly/iaes> by clicking "use template for new design". Then, you should update your presentation title, name, and affiliation, and download the virtual background. Kindly send your video file (MP4) to this email through <https://wettransfer.com> and allow us to download it for 7 days. When you submit your video, please inform us of your paper ID number and paper title.

We are looking forward to hearing from you

Thank you

Best Regards,
Prof. Dr. Ir. Tole Sutikno, ASEAN Eng.

----- IMPORTANT -- "Results and Discussion" section:

A great discussion is well-organized. One of the keys to writing a great paper is having a thorough and concise discussion. It provides a critical platform for interpreting and connecting your findings to the larger scientific context. The structure presented below is a traditional 6-step approach to writing a well-crafted discussion section, which is recommended for you when preparing your final paper.

- 1). Introduction—mention gaps in previous research
Example: This study investigated the effects of ".....". While earlier studies have explored the impact of ".....", they have not explicitly addressed its influence on ".....".
- 2). Summarizing key findings—let your data speak
Example: We found that "....." correlates with ".....". The proposed method in this study tended to have an inordinately higher proportion of "....." as ".....".
- 3). Interpreting results—compare with other papers
Example: Our study suggests that higher "....." is not associated with poor performance in ".....". The proposed method may benefit from "....." without adversely impacting ".....".
- 4). Addressing limitations—their potential impact on the results
Example: This study explored a comprehensive "....." with ".....". However, further and in-depth studies may be needed to confirm its ".....", especially regarding ".....".
- 5). Implications for future research—how to explore further
Example: Our study demonstrates that "....." are more resilient than ".....". Future studies may explore "....." with feasible ways of producing ".....".
- 6). Conclusion—summarize content
Example: Recent observations suggest that the ".....". Our findings provide conclusive evidence that this phenomenon is associated with "....." change, not due to elevated numbers of ".....".

In order to cover part of the publication cost, each accepted paper is charged USD 345. This charge is for the first 8 pages, and any published manuscript over 8 pages will incur extra charges of USD 50 per page. Indonesian authors should transfer IDR instead of USD. (Please refer to <https://www.xe.com> for the exchange rate.) We value collaborative papers and do not value papers with a single (sole) author. Papers with a single author will be rejected (or, if very good, will be considered for publication but will be charged twice the above fee: USD 690, and any published manuscript with more than 8 pages will incur additional charges of USD 100 per page). Biographies of authors are exempt from the APC fee.

The payment should be made by bank transfer (T/T):
