Dear Prof/Dr/Mr/Mrs: Mr Sreekanth . Kavuri,

It is my great pleasure to inform you that your paper entitled "Prevention
of Credit Card Fraud Transaction Using GA Feature Selection for Web Based
Application" has been initially ACCEPTED and will be published on the
Indonesian Journal of Electrical Engineering and Computer Science later,
after all final documents have been completed and reached us. This journal
is indexed by Scopus and ScimagoJR, with CiteScore: 2.9, SNIP: 0.528, and
SJR: 0.272. Congratulations!

Your paper will be published after fulfilling all requirements for
publication (strictly follow the guidelines at
http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5).
The presentation of the simulation and/or experimental setup (in the Method
section) must be clear and complete in every detail facilitating
reproducibility by other scientists. Present a picture of your simulation
and/or experimental setup and describe your work clearly. Please present
each reference as completely as possible while adhering to IEEE style
(including volume, number, pages, and DOIs). For your information, according
to international regulations, the similarity score of camera-ready paper
should be less than 25%. A single author is NOT acceptable, and will never
publish in this journal.

Please submit your below documents within 30 days to ijeecs.iaes@gmail.com
1. Final camera ready paper (in MS Word file format, or LaTeX source files)
2. Similarity report checking (that the result is below 25%, uses software
such as iThenticate or Turnitin), and
3. Payment evidence

The editor(s) will decide whether or not your camera-ready paper is complete
and meets the final guidelines.
When you send in all of the above documents and your final paper follows all
of the final instructions, your paper will be judged "fully accepted." It
will be the date of your paper's acceptance.

We are looking forward to hearing from you

Thank you

Best Regards,

Prof. Dr. Ir. T. Sutikno, ASEAN Eng.

------ IMPORTANT -- "Results and Discussion" section:

A great discussion is well-organized. One of the keys to writing a great
paper is having a thorough and concise discussion. It provides a critical
platform for interpreting and connecting your findings to the larger
scientific context. The structure presented below is a traditional 6-step
approach to writing a well-crafted discussion section, which is recommended
for you when preparing your final paper.

1). Introduction—mention gaps in previous research
Example: This study investigated the effects of ".....". While earlier
studies have explored the impact of ".....", they have not explicitly
addressed its influence on ".....".

2). Summarizing key findings—let your data speak
Example: We found that "....." correlates with ".....". The proposed method
in this study tended to have an inordinately higher proportion of "....." as
".....".

3). Interpreting results—compare with other papers
Example: Our study suggests that higher "....." is not associated with poor
performance in "....." . The proposed method may benefit from "....."
without adversely impacting ".....".

4). Addressing limitations—their potential impact on the results
Example: This study explored a comprehensive "....." with ".....". However,
further and in-depth studies may be needed to confirm its ".....",
especially regarding ".....".

5). Implications for future research—how to explore further
Example: Our study demonstrates that"....." are more resilient than ".....".
Future studies may explore "....." with feasible ways of producing ".....".

6). Conclusion—summarize content
Example: Recent observations suggest that the ".....". Our findings provide
conclusive evidence that this phenomenon is associated with "....." change,
not due to elevated numbers of ".....".

In order to cover part of the publication cost, each accepted paper is
charged USD 315. This charge is for the first 8 pages, and any published
manuscript over 8 pages will incur extra charges of USD 50 per page.
Indonesian authors should transfer IDR instead of USD. (Please refer to
https://www.xe.com for the exchange rate.) We value collaborative papers and
do not value papers with a single (sole) author. Papers with a single author
will be rejected (or, if very good, will be considered for publication but
will be charged twice the above fee: USD 530, and any published manuscript
with more than 8 pages will incur additional charges of USD 100 per page).

The payment should be made by bank transfer (T/T):

Reviewer's comments and suggestions to improve the paper. (If it is not possible, kindly please use separate sheets or a copy of the paper for comments and suggestions for revision. Indicate whether revisions are mandatory or suggested. Please use word processig type format if possible, and then upload or submit via email to telkomnika.iaes@gmail.com):
     The paper has been revised and presented well but there are some shortcomings that still need to be revised, among others:
- If Figure 2 contains Subfigure, please explain the Parent Figure and Subfigure in the body text and Figure caption.
- Based on the author guidelines, you should provide biographies info of the authors, covering email addresses and links to the authors' social media accounts as complete as possible: Scopus, ORCID, Google Scholar, and Clarivate.
For the rest I agree and would recommend your paper to the next stage.

    We recommend that the introduction section be written neatly and in order.
When updating your introduction section, carefully consider the following
issues.
1. Global: What global, national, or local problem or interest does the
paper's topic address? (Electrical, Electronics, Control,
Telecommunications, and Computer).
2. General: What general approach was and will be used to solve the problem?
(for example, wind turbines, image processing, and artificial intelligence).
3. Specific: What is the problem being addressed, and how is it being
addressed? (For example, CNN can be used to process lung cancer images).
4. Past Work: What previous efforts have been made to solve this problem?
What was the approach and what was the outcome?
5. Contribution: What insights or contributions will be made in this paper?
Please follow the introduction section on the template provided.
