(57) Abstract :
 ABSTRACT Education is a power tool that enables a person to perceive and disseminate his knowledge in a meaningful way. Education plays an important role in the development process of any society. In fact, education is considered as the most important means to empower people with knowledge, skills and self –confidence that enable them to participate in the development process. Education in technical sense refers to that process by which society through it’s different institutional deliberately transmit its cultural heritage to its young accumulated values, knowledge and skills from one generation to another The world is considered to a ‘Global City’ because every hook and corner of the world can communicate with any part of the world sharing information. The role of media in this global city is both significant and valuable and has far reaching influence on society especially on students. The twenty-first century people live in a drenched world of social media where they can search for the possibilities of enhancing knowledge that is stretched all through the corners of the global village. English is the one of the six official languages of the U.N.O and link language of the commonwealth countries. The rapid spread of industrial development, Science, Technology, International trade, English has become a world language. It is the means of International Communication; there are many methods for teaching English over the years which provided some kind of stepping stone towards an approach or theory which has ultimately aided the progression of teaching methods.
