(57) Abstract :
This Documentation is consisting of proposed technology which is used to change the online education system. During the pandemic time of COVID -19 VIRUS, all the students have started following online classes and the employees have started work home. The working parents are unable to monitor the students during online classes due to their works and all. At that time the students got misleader from the online classes and they got addicted to online games, social media and other activities. Many times the parents lost their money from the bank account due to online frauds.so, it is very important to monitor the students during the online classes in order to guide them towards their aim and goals. This INSTA ALERT device is used to control and monitor the students during online classes. It will give immediate alert to the parents when they minimized the online class window and doing other activities and help guide them towards their success.
