A home automation rule may be determined based on the particularized pattern, which rule may include an anticipation of an operational setting of a home automation device. The home automation device may be instructed based on the determined home automation rule. Refer Fig. 1

(57) Abstract :  
7. ABSTRACT The present invention relates to an improved web-based, knowledge management system for an education system. More specifically, the present invention relates to public education systems generally, and particularly to a comprehensive, real-time, interactive knowledge management system with integrated reporting features. The improved web-based, knowledge management system includes functionality for multi-tier data-gathering, data analysis, and data reporting capabilities that link, integrate, and output data at the student, classroom, school, district, and state governmental levels.
