(57) Abstract :
Our smart desk deals with education purpose. It is a digital display board which is used to write notes & it reduces the paper usage we can access notes from any corner of the world. The main idea is remove the burden of carrying the heavy load of bags which the small children in the schools or colleges face and it is a new idea to instead of carrying the books. Why don't we fix a digital display with touch screen access with can be note the notes with the help of stylus and provide a greater opportunity for educational institutions, because the future is technology. The digitalized smart desk employs a combination of sensors, touchscreen interfaces, embedded computing, and connectivity options to enhance productivity, efficiency, and user comfort. Users can seamlessly interact with the desk through intuitive gestures.
