(57) Abstract :

7. ABSTRACT The present invention relates to an improved web-based, knowledge management system for an education system. More specifically, the present invention relates to public education systems generally, and particularly to a comprehensive, real-time, interactive knowledge management system with integrated reporting features. The improved web-based, knowledge management system includes functionality for multi-tier data-gathering, data analysis, and data reporting capabilities that link, integrate, and output data at the student, classroom, school, district, and state governmental levels.
