(57) Abstract :

7. ABSTRACT A system for taking attendance using quick response (QR) code comprises of a storage database (106), a custom controlled software module and a QR code scanner (112). The storage database (106) is used to store the complete details of the students. The unique identification numbers (ID) of the students are stored in the storage database (106) and custom controlled software module is used to generate QR codes for every ID. The QR code scanner (112) is used to scan the QR code for recording of attendance for the student. The attendance is recorded with particular date, time and other attributes. Figure associated with Abstract is Fig. 1
